PALLET RACKING MAINTENANCE

FROM TRIMET STORAGE SOLUTIONS

Maintenance Frequency:

Depending on the type and intensity of use of the racks and cantilever maintenance can be carried out quarterly, semi-annually, or annually.

Service Notifications:

An automatic notification system about upcoming maintenance helps clients better plan their operations.

Safety Training:

Training clients on safety protocols and the correct use of racks and mezzanines helps reduce the likelihood of incidents and extend the lifespan of the equipment.

Documentation:

We can provide comprehensive documentation for all maintenance tasks. This ensures warranty, and safety compliance, aiding our clients in keeping their equipment consistent with the standards set by regulators and manufacturers.
